

**Review of the *SUREHITTER*® by Coach John Peters  
(from his website: *Baseballtips.com*)**

**Coach JP Says**

**You will play how you practice!**

So many of the younger & least experienced players get on the wrong track causing a lot of un-doing to correct them down the road. Even more leave the game prematurely as poor mechanics leads them to fall behind their teammates. As other players improve, poor play causes some to not get the successes that are within their physical abilities, and they ultimately leave this great game way before their time!

Since hitting is the one area that all players must succeed to play, it certainly makes sense to get the young ones on that right track...NOW!

The *SUREHITTER* is a teacher's tool...and one that any teacher, parent or even a seasoned coach can benefit from.

On the surface, it may not look overly unique or exciting because there are many "ball on a stick" products designed for simply hitting the ball...giving players the high numbers of repetitions that it takes to groove a swing. They resemble our Bat Stick and are very helpful for grooving the existing sound mechanical swing. But we are talking here about developing those mechanics and having players learn each crucial step in the process...a critical time in the younger player.

You will easily tell that the *SUREHITTER* was developed by a teacher...right down to the simple to understand manual and the positive reinforcement that Coach Joel Grubman gets his students to light upon in the very helpful video that comes with your purchase. Watch as coach shows you how to get the most out of the *SUREHITTER* with his Progressive Ball Speed Training Method starting with making sure the players understand the importance of keeping their eye on the ball, then simply increasing the velocity of the "pitches" as well as the location... **a good building block approach!**
